SAME donates \$20,200 to UOG School of Engineering

The Guam Post of the Society of American Military Engineers donated \$20,200 to the University of Guam School of Engineering throughout the year of 2020. The professional engineering association, whose aim is to build leaders and lead collaborations to develop solutions to national security infrastructure challenges, made the donation in four installments, with the final payment in December.

The University of Guam offers a four-year Bachelor of Science in Civil Engineering degree, with the mission of developing highly competent professionals prepared for entry-level positions in civil engineering or to continue on to graduate school. The School of Engineering has 148 students currently enrolled in its bachelor's program.
